## Halliburton Jobs

**Introduction-** Halliburton is one of the largest service and product providers in the world to the energy industry. The company was established in the year 1919 and has approximately 70,000 employees in nearly 80 countries. It is a public company which has made its priority to provide superior quality and safe services and products to its customers.

**Company History:** Halliburton was founded in the year 1919 and has a fascinating history. Erle P. Halliburton started a small oil well cementing company in Duncan, Oklahoma. The first research laboratory of the company was established in the 30s. This allowed the company to offer acidizing services for breaking down the resistance of the limestone formations, increasing the production of gas and oil. In 1926, the company took its first step towards establishing itself as a worldwide organization.

It sold cementing units in Burma and opened its business in Canada. By 1940s, the company had its operations expanded to Venezuela. Using its innovative and unique technology, the company had expanded to the Middle East, Peru, Ecuador and Colombia by 1946. The company first expanded to Europe in the year 1951. During the next 7 years, the company also setup its operation in England and Argentina.

In 198, the company became the first ever American company that performed oilfield service on china mainland. Halliburton realigned its operations into Western and Eastern operations in the year 2006 and divided its services into two separate divisions.
