
25 Podcasts to Set You on the Road to Freelancing Success

Summary: *Successfully freelancing into a steady income takes time to build, but knowing where to start requires diligent study.*

Freelance work may be your side hustle or your primary job. Either way, the opportunities for success are endless if you are willing to put in the work to make it happen. **Side jobs allow you to focus** on what you are interested in, grow your personal brand through networking, and give you flexibility to turn it into something that makes you big money, in the end requiring you to quit your 9-5 job. In order to get to this point, you will have to do some research and study into what it takes to make freelancing work. The idea of spending hours reading books and attending classes may not be for you, so turn on these podcasts during your commute to work to start your research.
